

Engineering Research

<https://engineering.virginia.edu/research>

From developing novel treatments for deadly diseases to securing our interconnected world, UVA Engineering knows that creating a better future will require the talents, ideas and ingenuity of excellent researchers.

Our research initiatives fall into the following broad areas:

- **Engineering for Health**
<https://engineering.virginia.edu/research/engineering-health>
- **Engineering for the Cyber Future**
<https://engineering.virginia.edu/research/engineering-cyber-future>
- **Engineering Technologies for a Sustainable and Connected World**
<https://engineering.virginia.edu/research/engineering-technologies-sustainable-and-connected-world>

Office of Research

The Office of Research leads, inspires, and directs all aspects of the growing research program in the School of Engineering and Applied Science.

<https://engineering.virginia.edu/about/offices/office-research>

Responsibilities of the Office of Research:

- Leading UVA Engineering in identifying research grant opportunities
- Assisting and encouraging faculty in seeking sponsored research funding
- Ensuring that research is conducted in accordance with grant requirements, legal requirements, and University policies and procedures
- Acting as a liaison with funding agencies and university and corporate partners
- Serving as a liaison with University research leadership

Associate Dean for Research

Susan L. R. Barker, Ph.D.

Director of Research Administration

Stephen Cornelison

sc6bt@virginia.edu

434-297-7402

Research Development and Corporate Relations

The Office of Research Development supports the development of research plans and strategies; assists with engagement with funding agencies; and serves as the interface for UVA Engineering Corporate Relations, the primary point of contact for research-related corporate interactions.

<https://engineering.virginia.edu/about/offices/office-research/research-development>

The office provides:

- Research development resources
- Support for major proposal development
- Strategic advice on funding opportunities
- Early career faculty research strategy development

Office of Pre-Award Research Administration

The Office of Pre-Award Research Administration consists of a dedicated team of research administration professionals committed to facilitating the submission of competitive proposals and the management of all pre-award activities for UVA Engineering.

Contact

ena-opra@virginia.edu

<https://engineering.virginia.edu/about/offices/office-research/office-pre-award-research-administration>

Responsibilities include:

- Interpreting sponsor regulations and guidelines
- Ensuring fulfillment of all requirements and compliance with rules and regulations
- Overseeing progress & submission of applications
- Engaging in the development of budgets and all administrative aspects of applications
- Serving as liaison with the University's Office of Sponsored Programs (OSP)

Office of Post-Award Research Administration

The Office of Post-Award Administration is committed to providing the highest-quality post-award administrative services by working collaboratively with faculty and staff to deliver award account management services. We work closely with UVA's central research administration office, OSP, to provide the most efficient award administration services possible.

Assistant Director

Jingyi Fan

seas-postaward@virginia.edu

434-297-6819

<https://engineering.virginia.edu/about/offices/office-research/post-award-administration-office>

Responsible for:

- Award administrative processing
- Financial Analysis
- Compliance and regulation assessments
- Risk mitigation management strategies
